SUMMARY:

Young Game Designer with a lifelong passion for creating interactive experiences. I have honed my game development skills since the age of 12, and feel eager to get more experience in the field of game design and contribute to a creative and innovative game development team.

PROJECTS AND PROFESSIONAL EXPERIENCE:

The Dust-O-Mancer (Student Project)

Vancouver Film School - March 2026 - July 2026

- I worked with 3 other students to create what we call a cleaner shooter game.
- Created 30+ different shaders and VFXs using unity shader graph, VFX graph, and HLSL.
- Created and iterated on a level with 9 rooms using a modular kit which I created using Maya.
- Designed and programmed a engaging shooter system with the twist of a cleaning theme.

Junior Systems Analyst (Full Time Job)

Icaro Technologies, Campinas, Brazil - January 2022 - December 2025

- Provided technical support to clients in the telecommunications field.
- Collaborated effectively with internal teams (e.g., development) to ensure timely resolution for client problems.
- Utilized logical thinking to diagnose complex system issues and implement appropriate solutions.

Sinuca Attack for Switch, Xbox and Playstation (Shipped project)

July 2020

- I had the opportunity to release a platformer puzzle game I initially made for a Brazilian game jam into Consoles. Expanding on its content and adapting all systems to make sure they would work properly once shipped to the 3 platforms. I worked at this project as the main programmer and Game Designer.

EDUCATION:

Diploma in Game Design - January 2026 - December 2026

Vancouver Film School, Vancouver, Canada

Associate's Degree in Digital Game Development - January 2022 - July 2024

Pontifícia Universidade Católica de Campinas, Campinas, Brazil

Associate's Degree in Technology - January 2019 - December 2021

Municipal Center for Vocational Education Osmar Passarelli Silveira, Paulínia, Brazil

PROFESSIONAL SKILLS:

Game Design

Gameplay Design, Level Design, Systems Design and Balancing

Game Development Tools

Unity (Proficient), Unreal Engine 5 (Intermediatee), GameMaker (Proficient) and Godot (Basic)

Software & Programming:
